

Bronquivet NF
Reg. Key SAGARPA Q-0524-057*
FOR VETERINARY USE
Guaiaicol – Carbocisteine– Piroxicam
Injectable Solution

Expectorant, mucolytic, anti-inflammatory and analgesic

DRUG DESCRIPTION

Every 100 mL contain

Guaiaicol	10 mg
Carbocisteine	20 mg
Piroxicam	2 mg
Excipient c.b.p.	100 mL

- Bronquivet® NF Is an ideal concentration of main components that give the product therapeutic effects in only one application.
- The clinical effect of the product includes an immediate expectorant effect. The mucolytic effect shows 15 minutes after application. It also has anti- inflammatory, antipyretic, and pain relieving effects that last up to 48 hours because of the piroxicam which is a non-steroidal anti-inflammatory.
- It improves breathing (improves ventilation) and stimulates the discharge of bronchial mucus. It also increases mucus discharge from the respiratory system due to its expectorant effect. It reduces viscosity of the bronchial mucus because of its mucolytic effect.
- At the infectious spot it improves penetration, diffusion and concentration of antibiotics that are jointly administered.
- It relieves pain
- With Bronquivet® NF the therapeutic response of associated antibiotics is improved and the treatment period is reduced.
- Ideal for extreme weather, dry air areas, dusty air and/or polluted air.
